Conference topics

- Design theory and construction technology of long-span arch bridge
- Monitoring and evaluation of arch bridge structure
- The sustainable development of arch bridges

- Application of new materials, new technology and new equipment in arch bridge

Conference objectives

World Conference on Long Span Arch Bridge Construction Technology (CABCT 2019) will be held in Nanning, China from 8 to 10 December 2019. The conference aims to promote international exchanges in the field of arch bridges, broaden international horizons of domestic researches, promote the development of arch bridges, and to display advanced technology and scientific achievements in arch bridges. The theme of the conference is "Innovation and Development of Arch Bridges".

The first World Conference on Long Span Arch Bridge Construction Technology is an international professional event. The purpose of this conference is to explore frontier scientific and engineering issues in the field of arch bridges. The agenda of the conference covers such hot topics as arch bridge design theory, construction technology, testing methods, maintenance and reinforcement, new materials, etc. The conference will host nearly 400 internationally renowned experts and scholars from 20 countries and regions. It will accommodate a variety of activities such as opening ceremonies, theme forums, parallel forums and poster exhibitions. It will be a magnificent international conference for industry experts to discuss the state of the art and to exchange academic ideas. It will be a free platform for scientific researchers and engineering technicians engaged in the research and application of arch bridges.

We sincerely invite experts, scholars and scientific and technological elites in the arch bridge and related fields to attend in World Conference on Long Span Arch Bridge Construction Technology. Through the face-to-face communication, we can obtain the latest information, discover new ideas, strengthen academic exchanges, and jointly promote the further development of arch bridge research and engineering applications in related fields.
